What sets our training apart?

Experiential learning with world leaders in entrepreneurial education

Frameworks for infusing an entrepreneurial mindset into any classroom

An ongoing community of entrepreneurial educators from across the world

Let's Transform Education Together!

To address the soft skills gap and increase intrinsic motivation for the modern student, EntrepreNOWship Institute has embarked on a mission of training educators to foster an entrepreneurial mindset in all students – Kindergarten through 12th grade – using innovative, experiential learning opportunities.

All Attendees will experience sample entrepreneurial lessons, activities, and capstone projects that may be adapted for any subject area or grade level.

Elementary Educators will learn how to transform their classroom into an entrepreneurial playground. Attendees learn how to teach employability skills and resiliency at a young age using token economies, class jobs, market days, student businesses, and more.

Middle and High School Educators will develop a plan to bring an entrepreneurial-focused program, course, unit, project, or school-based enterprise to their school or classroom. Attendees learn how to apply the entrepreneurial mindset in their own subject area using innovative teaching strategies and project-based learning to promote problem-solving, literacy, critical thinking, adaptability, and resiliency.
